UI/UX developer and final-year Computer Science student who **designs in Figma and builds in React / Next.js**. I've shipped a live e-commerce storefront end-to-end and design new-gen product interfaces across fintech, wellness and AI. I care about design systems, accessibility, and the craft between mockup and production.

EXPERIENCE

UI/UX Developer — Shree Navya Food Products · Freelance 2024

- Designed and built the brand's **live e-commerce storefront** end-to-end — UX flows, visual identity and the full responsive front-end in Next.js.
- Created a reusable component system: variant-aware product cards, category filtering and a warm, trustworthy brand identity.
- Shipped to production and serving real customers at shreenavyafoodproducts.com.

Data Science Intern (Python) · NIELIT Nov 2023

- Completed an intensive program in Python data analysis and visualisation (NumPy, Pandas, Matplotlib), strengthening the analytical foundation I bring to UX decisions.

SELECTED PROJECTS

Shree Navya Food Products ● LIVE Next.js · Live

Production e-commerce storefront for an Indian FMCG brand — filterable catalog, variant selection and a warm design system. shreenavyafoodproducts.com

Aurora — Neobank Figma → React

Fintech mobile-banking concept designed to make money feel calm: glanceable insights, instant transfers and fluid motion, built on a token-driven design system.

Bloom — Wellness & Fitness Mobile · Figma

Calm, accessible wellness app with adaptive daily goals, forgiving streaks and human data-viz — designed around the days users don't feel like it.

Lumen — AI Analytics SaaS · Figma

Dark, data-dense analytics dashboard with an AI copilot that turns plain-language questions into charts and explainable, source-cited narratives.
